-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 10-11 and 15-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Watson et al. US Pat. 6,310,308.

Watson teaches a push button switch comprising:

a housing 16;

an actuator 18;

an organic light emitting diode 14 (OLED; col. 6, line 39);

transparent cover 48 mounted to the actuator and OLED is mounted to the housing to remain stationary as the actuator moves;

Regarding claim 5, Watson disclose a controller circuit to control the OLED. Please refer to col. 3, lines 25-55.

Regarding claim 6, transparent cover 48 mounted to the switch actuator to cover the OLED.

Regarding claims 10 and 11, Watson disclosed programming OLED display. Please see col. 3, lines 25-55.

Regarding claims 15-16 and 19-20, please refer to above.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 12-14 and 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watson in view of Conigliaro US Pat. 3,611,333.

Regarding claims 12-14 and 21-23, Watson teaches the claimed invention except for the switch employing an RF receiver. Conigliaro teaches a remote station having a receiver with visual signal to indicate actuation. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the switch device of Watson with transmitter/receiver as taught by Conigliaro since transmitter/receiver would provide the switch device of Watson with the ability to operate his switch remotely.

Allowable Subject Matter

5. Claims 7-9 and 17-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
